## LittleDryCr

Little Dry Creek Trail (North metro)

[Trail Network Overview](#)

Follows Little Dry Creek from Clear Cr confluence to end S of Standley Lake near Indiana st. Then W on highway 72 to highway 93, southward to 64th where it meets Golden Leyden Tr

**Key** LDC

**Connects to:** [Big Dry Creek Trail](#)  
[Clear Creek Trail](#)  
[Golden Leyden Trail](#)  
[Ralston Canal Trail](#)

**Also Known As:**

**Waypoints** 24

**Modified** 10/15/17 Trail rebuild for Westminister Station Park, 64th Ave Bridge

via dirt road

Distance Statistics			
Cycle Computer	TrackLog	Route	Round Trip
	19.0	16.5	

Elevation Statistics							
Start	End	Min	Max	Gain	Ascent	Descent	Grade
5,200	5,897	5,190	6,243	697	1,384		2

**Type** Drainage

**Rating Codes** Rpnr Mid, Climbs to CO 93 & CO 72 intersection

**Surfaces** Mostly concrete path, some street & sidewalk, Latter sections are asphalt shoulder lane

**Notes:**

Trail has two starting points (one at both East & West) on the Clear Cr Trail. Route started from the W junction. Track log shows both routings along with a connection between starts. Track starts @ W Clear Cr Trail junction to minimize redundant track & start @ a trailhead.

Sections on CO72 & CO93 are single bike width asphalt shoulders  
 Can make loop by following Golden Leyden Trail to Eldrige St spur, then following Ralston Cr Trail, then down to Clear Creek to start.  
**Watch for broken glass in concrete walled sections especially in summer!**

**Type** Drainage

**Rating Codes** Average, steep on Cotton Cr trail & near Pecos St. Rr

**Surfaces** Mostly concrete & asphalt paths, shopping center lot, residential streets.

**Notes:** Very narrow in Cotton Cr trail section. (Please watch your speed)  
 Can bypass steep up/down on Pecos N of 96th by staying on 96th to Federal, then N to track.

## Trail Type Codes

Descriptions of trail types

[Trail Network Overview](#)

**New**  
3/11/2009

Trail descriptions are subjective and can change due to construction etc.  
Some trails are **conditional** road bike using some detours.

**Notes**

Some trails may be a mixture of surfaces from start to end.  
I will try to separate codes in those cases. Sometimes street alternatives exist.

Code	Name	Description
R	Road Bike	Concrete/Asphalt surfaces
F	Fat Tire	Dirt sections not too rough/rocky or steep - Suspension not required.
M	Mountain Bike	Dirt sections may be rocky, rough and steep - at least front suspension very helpful
E	Equestrian	Horses may share or cross path in places
C	Closures	Trail may have seasonal closures for habitat
X	Break in Trail	Trail currently has a break in it as indicated.
Code	Name	Description
p	Multi-Use Paths	Multi-Use Paths (Pedestrian/Bicycle)
a	Asphalt	Asphalt surface
c	Concrete	Concrete surface
b	Bike Lanes	Marked bike lanes
w	Wide shoulders	Wide shoulders - bigger buffer zone
n	Narrow shoulders	Narrow shoulders - may disappear in some places
r	Residential Streets	Residential streets - less traffic
l	Light Use streets	Light Industrial or other lighter use city streets
x	Busy Streets	Busy street use - Extra caution required
d	Dirt / crushers	Dirt sections should drain quickly after rain/snow
m	Mud	Dirt sections may be muddy / don't drain quickly
s	Single Track	Single Track - trail may get very narrow!

Hikers and horses may share these trails with you.  
Please be courteous and friendly.  
Horses can be nervous around bicycles, dismount if possible.

Regional trails often have posted speed limits that must be observed.  
Riders going uphill have right of way - keep speed under control especially on corners.  
Trails may also have gates that need to be closed behind you to keep livestock from straying.

**You can be ticketed/fined for not observing trail regulations.**
